

## Amendment Worksheet

Created by Denis Szahin from Noun Project

Name:       Sage Smith      

My Amendment is:                   the 19th Amendment                  

It was ratified on:                   August 19, 1920                  

It changed the Constitution by:                   guaranteeing women the right to vote in every state.                  

---

---

This means that BEFORE it was ratified:                   women in some states were not legally allowed to

                  vote in elections. This means they did not have a significant voice in government.

---

AFTER it was ratified                    women were guaranteed the right to vote in elections.

This means that it was now illegal for a state to deny women the right to vote in elections.

---

---

This is important because: if women were not able to vote, they would not have a voice in  
who their representatives or president were.
